

# Paramonos Research & Consulting

a Lean Six Sigma Consulting Firm focus on Cost Savings & Process Improvement

## Services

## Services

We provide Lean Six Sigma Advisory services in three vital areas; business, quality and process improvement in operations. Our objective is to assist you to improve your business performance using proven best practices leading to improved financial results.

### Lean Six Sigma Training

Training for various levels of staff (Strategic, Tactical and Operational) on Lean Six Sigma Methodology – Define, Measure, Analyze, Improve and Control (DMAIC). Training on how to select Lean Six Sigma projects for sustainable results.

### Key Objective/Benefit

- Improved operational efficiency and effectiveness
- Capacity of personnel to lead successful and sustainable business improvement projects for improved revenue and cost reduction.

### Lean Six Sigma Deployment

Provide advisory services in the implementation of Lean Six Sigma approaches for prioritized business units. Help build the culture of continuous improvement. Support post-deployment tracking, monitoring, and evaluation. Promote the culture of zero waste in business operations through effective change management.

## Key Objective/Benefit

- Improved Return on Investment
- Reduced waste leading to lower cost
- Improved shareholders and customer confidence in products and services

## Lean Six Sigma Certification

Support the certification process of your staff as Lean Six Sigma Yellow, Green and Black Belt professionals.

## Key Objective/Benefit

- Improved shareholders and staff confidence
- Increased sales due to product and service satisfaction by customers
